

ENGLISH

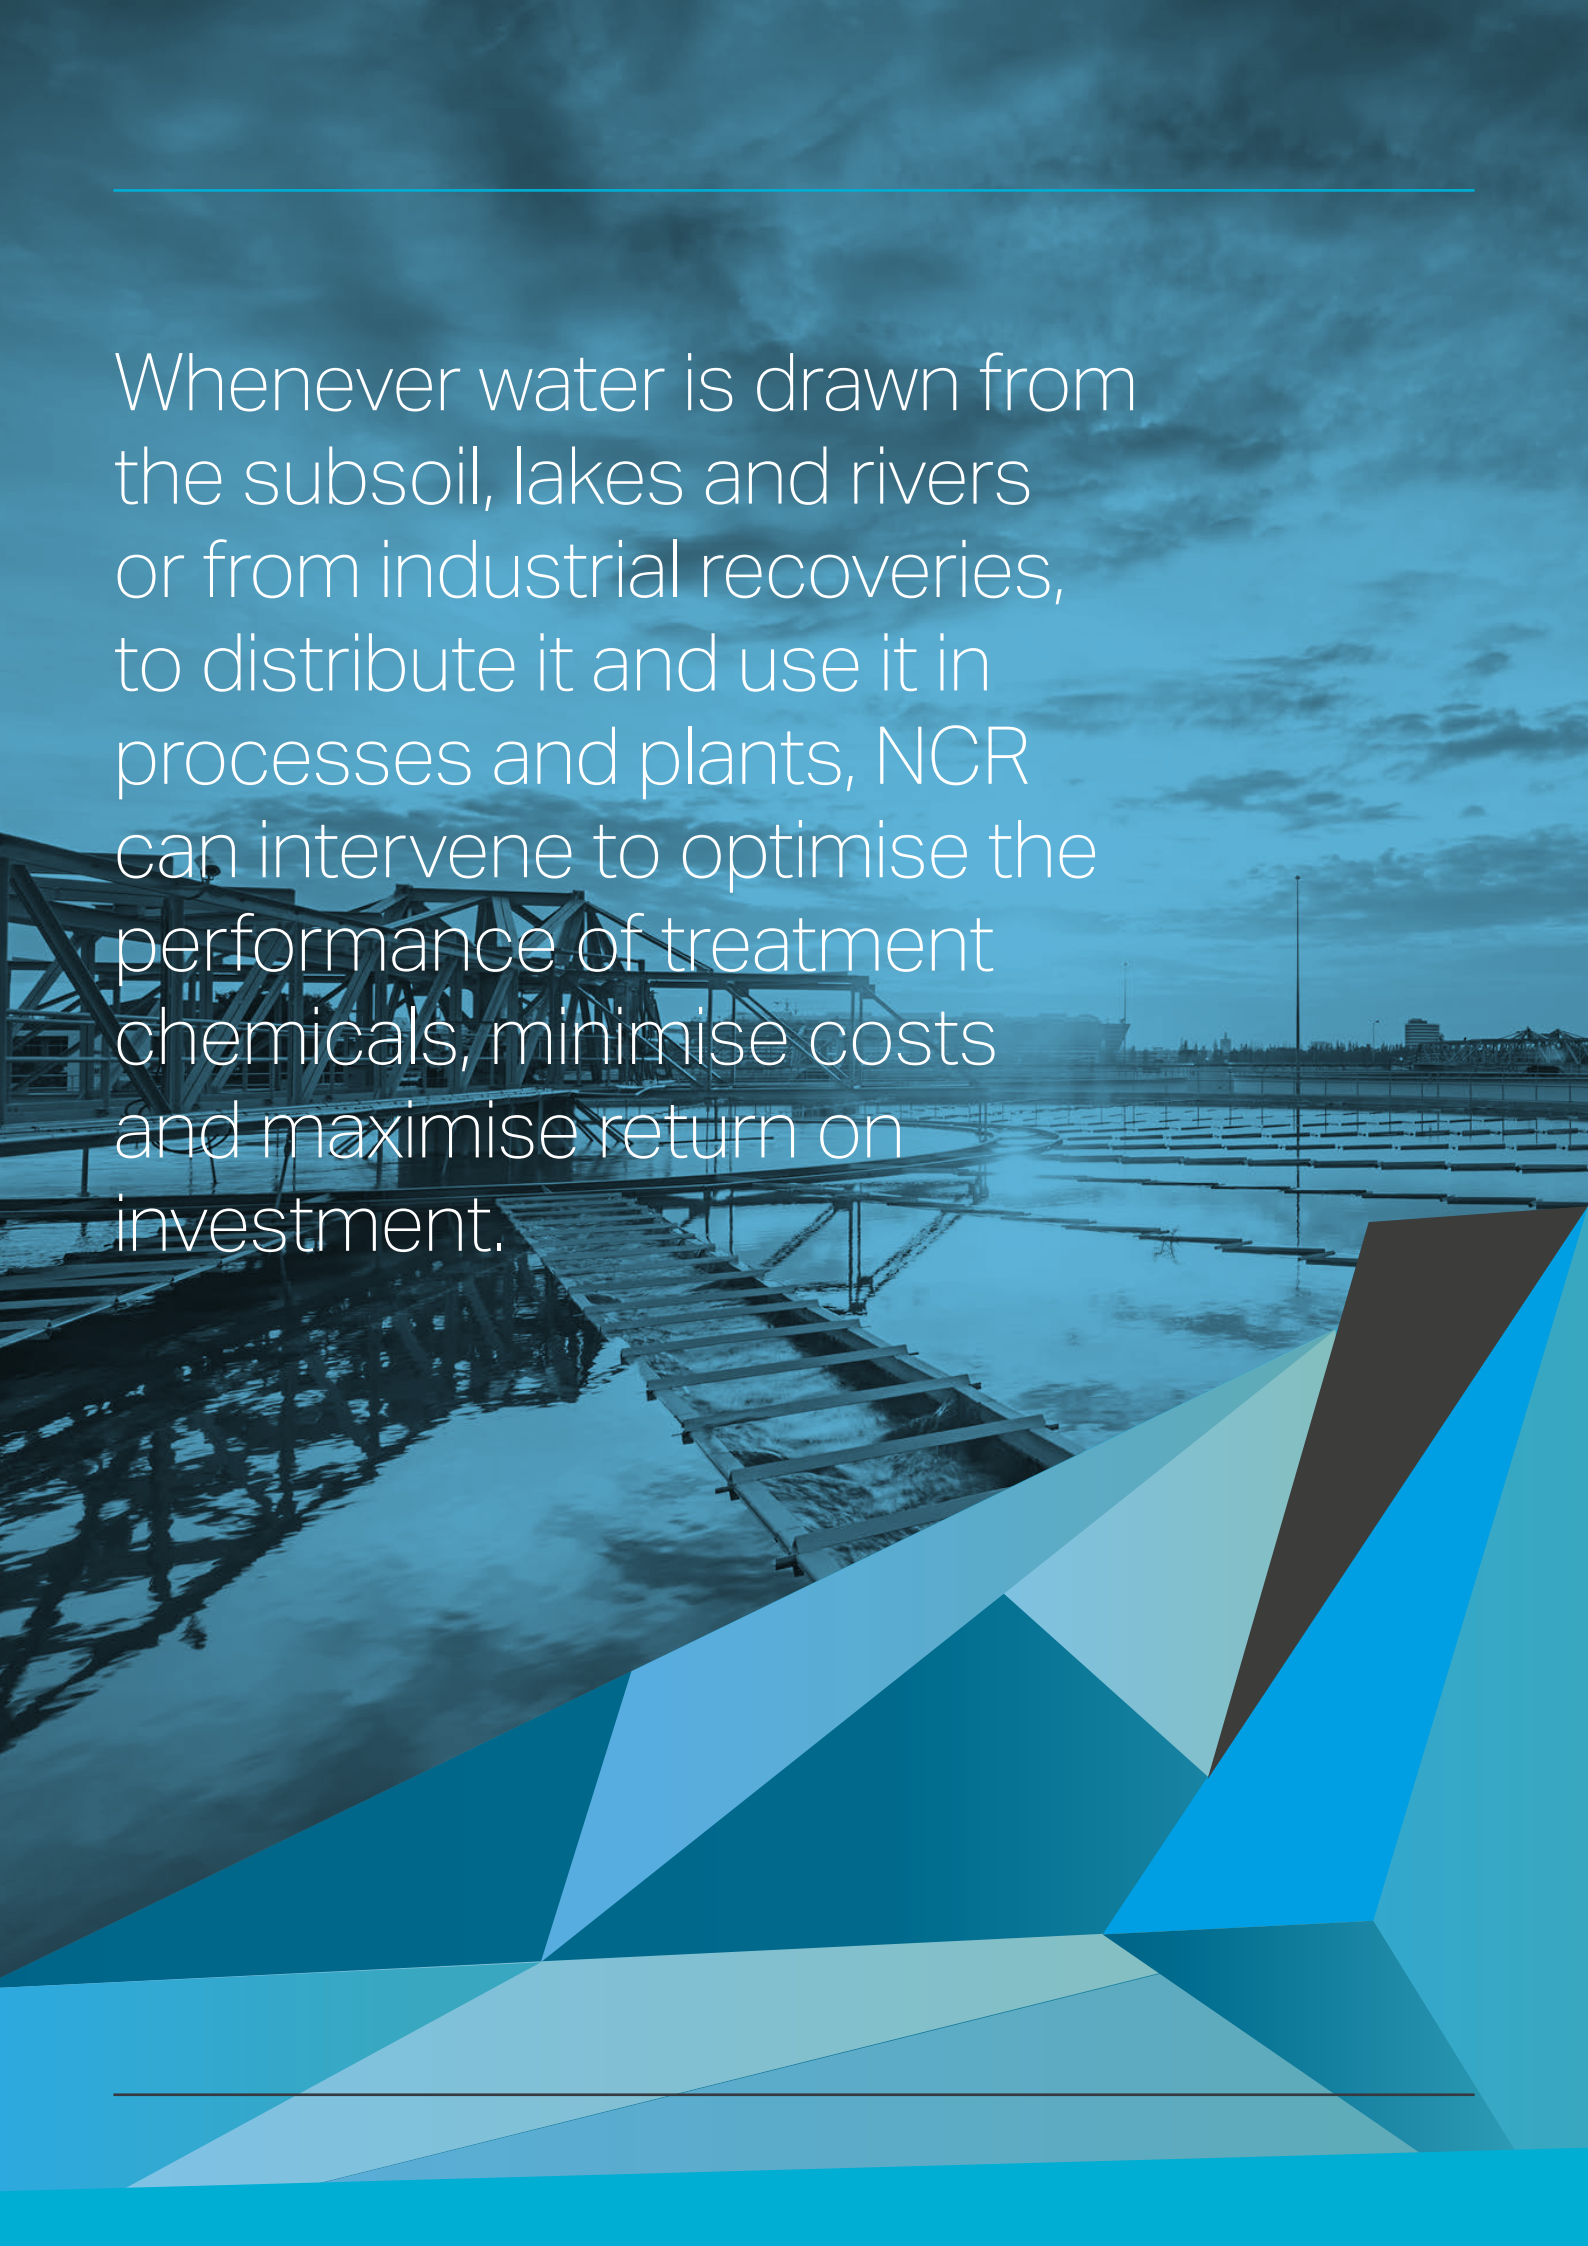

WATER DIVISION

Primary water

Whenever water is drawn from the subsoil, lakes and rivers or from industrial recoveries, to distribute it and use it in processes and plants, NCR can intervene to optimise the performance of treatment chemicals, minimise costs and maximise return on investment.

The background image shows a large-scale water treatment facility with multiple circular and rectangular tanks. The scene is captured in a monochromatic blue color scheme. In the foreground, there is a complex geometric overlay composed of various shades of blue and teal, creating a modern, abstract design. The text is overlaid on the upper left portion of the image.

SOLUTIONS

NCR Biochemical has complete water clarification and treatment programs aimed at:

- Increasing the removal of suspended solids,
- Eliminating or reducing colour,
- Eliminating or reducing pollutants
- Reducing the volume of sludge produced
- Controlling microbiological growth
- Restoring the proper operation of wells

NCR Biochemical provides effective and innovative solutions to help customers meet all water quality-related requirements. Our treatments lead to safe results that fully respect the environment.

Product range

POLYREN® 1500 SERIES

- Mineral coagulants
- Organic coagulants
- "Green" coagulants
- Decolouring agents
- Filtration aids

POLYREN® 4000 AND 8000 SERIES

- Cationic and anionic powder flocculants

POLYREN® 3000 E 5000 SERIES

- Cationic and anionic emulsion flocculants

POLYREN® 6000 AND 7000 SERIES

- Cationic and anionic flocculants in aqueous dispersion

SANITER® SERIES

- Specific bactericides compliant with the BPR (EU Regulation 528/2012)

BIOSOLV PLUS AND BIOSOLV COMPLEX SERIES

- Specific descalers for remediation of wells

Through studies in the field and at our R&D laboratories, our technical support service can identify the best technical and economical solution tailored to specific needs. NCR has control and automation systems, used with the dosing of additives, which allow maximum flexibility in treatment and the optimisation of costs.

NCR Biochemical is an international chemical company specialized in water treatment, biotechnology and process additives in the paper and sugar industries. We produce the best chemical technologies, find the best solutions for our customers, develop our own dosing systems and have thirty years experience and expertise in pursuing quality, safety and environmental responsibility. We confront the global industrial reality with a comprehensive scientific approach which brings benefits and results to our clients.
